

Why I Want The Scholarship

By: Isaiah Mcintosh

When I was talking to my teacher about what I wanted to be when I was older I said scientist so she recommended Space Camp. When I saw Space Camp online, it just clicked. I was really looking forward to attending Space Camp. I think it is important to attend Space Camp because I would like to be a scientist and attending Space Camp would open my mind to new knowledge about science and things I haven't yet learned about yet. It would be an amazing experience. I would also like to attend Space Camp because I think it is a great opportunity to discover what types of electronics are out there and how they function. I think attending Space Camp would be a great chance for me to open up and discover what other types of rocks, minerals, robotics, and other discoveries there are out there. I really hope that I get this chance because I never know this could be my only chance and I really would like to take this chance and do something really amazing with it. I know that Space Camp would be good for me and really amazing opportunity. I really hope that you grant me the scholarship so that I can learn new things about robotics and learn more about astronomy.
