### Why I want to go to space camp

There are so many reasons why a person would like to attend Space Academy, and there are even more reason why I would like to attend this camp. Not only will Space Academy be a fun experience but it will also be educational and informational.

When I grow up I would love to be an engineer and being that there a different aspects of engineering, I'm currently searching for the field of engineering that best suits me. I have been in the STEM program since I was in the 6th grade with a wonderful STEM teacher Ms Rayela who has sparked our interest in science, technology, engineering and math.

My STEM class have participated in different STEM competitions like Lego, Robotics, sea perch etc but we have not done much in the area of space and rockets and this will be an awesome opportunity and experience for me. Going to Space Academy would be a wonderful experience for me to learn more about the world of engineering and broaden my understanding of space. Engineering is amazing as well as fun. I could learn more about being an Astronaut, Mission Specialist, or Payload Specialist. I could learn more about our solar system and all of the things that happens outside of the earth's atmosphere. I would also like to go to Space Academy because of all the exciting activities that I can participate in. I would love to simulate a space shuttle take off and be in charge of making sure our shuttle lands safely. In all I just think that Space Academy would be an amazing summer program to take part in and I feel lucky to even know about such a program.
