

The goal I want to accomplish is to obtain a Health administration degree. My dream job is to become a hospital administrator. This career relates to finance. I want to be a leader and help around the hospitals and the clinics. My career will make a difference in the world because I will be helping others. I want to also become an entrepreneur and open up my own business or hospital one day. I want to help vulnerable populations. I want to continue helping people in my career. I want to help others especially the vulnerable populations. I have performed community service by giving the homeless gift baskets and cans of food. The goal that I want to accomplish in the next 5 years is to obtain a healthcare management (STEM) Degree.

Education is important because this degree will help me to have a successful career in the next 10 years. I am very dedicated to my goal of becoming a Health Administrator. I work diligently and strive for excellence every day to fulfill my dream of becoming a Hospitality manager. My short-term goal is to become an administrator in a clinic and then my long-term goal is to work in a hospital.

The college will help me obtain my degree in Health Administration. With my degree, I have the knowledge, skills, and confidence that will help me to be successful in my career. This scholarship would benefit me because I have over \$70,000 in loans despite receiving over \$30,000 in grants and scholarships. I hope you will help me.

All I ever wanted to do in life was improve the community and the lives of people around me especially vulnerable populations. I want to create a more inclusive world by accepting everyone for who they are and being kind to everyone no matter how they

treat me. I have always loved helping people and caring for people. I believe health administration is the right career for me to do just that. The thought of impacting and making a difference in people's lives is very fulfilling for me. I am also extremely passionate about furthering my education to achieve my goal of becoming a health administrator.
