To: Whom it may concern

From: Tom Niesen

Re: Jason Parker

The purpose of this letter is my personal recommendation for Jason Parker. Jason is a hard working individual who thoroughly enjoys the challenges of the HVACR industry. In the half dozen classes I had the pleasure of having Jason as a student he was always enthusiastic for learning. He looked at the challenges of learning new subject matter not as an obstacle but as an obtainable goal that was just one more step in what he wanted to achieve. He always participated in class, asked questions for clarification and was willing to practice a new skillset until he had mastered the concept. He will be a valuable asset for anyone looking for a bright and goal orientated individual.

Tom Niesen

Gas Utility Lead

(Former Division Chair of Manufacturing)

To whom it may concern,

I met Jason Parker as a student in our HVAC and Facilities Maintenance program. Jason has been a dedicated student and an example to his fellow classmates. Jason has worked very hard to be successful in our programs and his school work and lab assignments are high quality. I am proud to recommend Jason for this award.

To whom it may concern,

08/22/2016

I have a special interest in everything involving HVAC&R. There is no limit to knowledge that I am prepared to receive. I haven't been in the field at all yet, the only experience that I have is hands on in the school labs. When I first joined the program I didn't understand any of it, but as time went by, I begin enjoying how the sequence of operations worked. It is a wonderful feeling learning how an application works and also how to troubleshoot. My instructors taught me not to be a part's changer, but how to find out "why" the system failed. Each course I have taken has been a great experience for me. I remember my blueprint reading class, I use to see those papers all the time, not knowing how to read it and how much information was indicated. As I begin to learn how to read it, I wanted to master it. There is so much to learn in the HVAC&R Industry, because there are so many applications, it's like once you learn about one thing it's leads you into another. I just want to be great like my instructor's, I said to myself one day "God! Help me to gain all of that knowledge like my instructors have, so that I can teach it to those young men and women coming up after me. The reason I chose this college is because they have the best hands on training program and I think they are the only ones in my area that allows you to receive a bachelor's degree. I would really like to win this scholarship, it would help me out a lot and also take a tremendous amount of stress off of me. At this moment I have nowhere to run to, as far as getting the help I need financially. If I do win this scholarship, I promise to give it all that I have and try to get the best grades.

Thank you,

Jason M. Parker
